SAMYAK ANAND

AI ENGINEER | GENERATIVE AI • RAG • AGENTIC SYSTEMS

+91 96237 19948 | samyak.g.anand@gmail.com | Hyderabad, India
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI-focused software builder with experience across machine learning, NLP, data pipelines, and LLM application development. Builds Python-based AI workflows with retrieval-grounded answers, typed APIs, structured tool execution, data validation, and inspectable outputs. Combines hands-on project development with data-science mentoring and analytical problem solving.

TECHNICAL SKILLS

Generative AI & RAG: LLM application development, prompt engineering, embeddings, semantic search, retrieval-augmented generation (RAG), tool calling, structured outputs

AI / ML & Data: Python, scikit-learn, TensorFlow, Keras, PyTorch, NLP, Pandas, NumPy, feature engineering, model evaluation, statistical analysis

Backend & Data Systems: FastAPI, Flask, REST APIs, Pydantic, SQL, PostgreSQL, MySQL, SQL Server, MongoDB, ETL, data validation

Engineering & Deployment: Git, GitHub, Docker, MLflow, DVC, GitHub Actions, AWS, Azure, GCP

Analytics & Visualization: Power BI, Tableau, Matplotlib, Seaborn, Excel, Power Query, DAX

PROFESSIONAL EXPERIENCE

Softgrowth Infotech — Data Science Trainer | Commission-Based Engagement
Oct 2025 – Present
Chandrapur, Maharashtra

- Mentor learners in data science, machine learning, Python, and analytical workflows; guide practical exercises and project implementation.
- Translate technical concepts into structured explanations and hands-on demonstrations.

Evoastra Ventures Inc. — Data Scientist Intern (Lead)
Jun 2025 – Aug 2025
Remote

- Led a 5-person intern team building automated analytics workflows, improving delivery efficiency by 25%.
- Built an NLP recruitment-scoring workflow combining semantic embeddings, TF-IDF, and skill overlap, reducing manual screening effort by 60%.
- Developed a web-scraping pipeline for market-trend and pricing analysis and presented findings through stakeholder-facing dashboards.

Gilbert Research Center — Data Science & ML Intern
Mar 2024 – Jul 2024
Remote

- Performed statistical analysis and exploratory data analysis on clinical datasets to identify patient-risk factors and improve data interpretability.
- Built modular ML workflows tracked with MLflow to support reproducible experiments and clearer model-development handoffs.

SELECTED AI PROJECTS

ARGUS AI — Enterprise AI Knowledge & Decision Agent

Python • FastAPI • Next.js • TypeScript • RAG

Designed an evidence-oriented document Q&A workflow for PDF, DOCX, Markdown, and text sources; separates retrieval from synthesis, validates citation passage IDs, and keeps generation disabled by default.

NEXUS — Autonomous Data Analyst

Python • FastAPI • Pandas • SQLAlchemy • SQLite • Next.js • Docker

Built an agent workflow for structured datasets that profiles data, plans analysis, selects deterministic tools, executes and validates steps, and produces inspectable reports and run traces.

AI Resume Analyzer & Ranking Tool

Python • Flask • Sentence Transformers • TF-IDF • PDF/DOCX parsing

Built a resume-to-job matching app using weighted scoring: 50% semantic embeddings, 30% TF-IDF, and 20% skill overlap; added modular document parsing and a Bootstrap interface.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science Engineering — Ballarpur Institute of Technology, Maharashtra | 2021 – 2024

Polytechnic Diploma, Computer Science — Bajaj College of Polytechnic, Maharashtra | 2018 – 2021

- Full Stack Data Science & AI — Naresh IT (600+ hours), 2024
- Data Science & Machine Learning Advanced — Udemy, 2024
